

# FOR MKS V1.1 Firmware refresh instructions

1

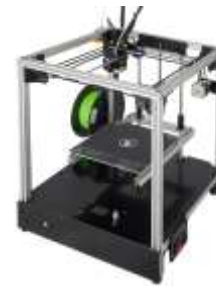

Open the lite\_cfg file with Notepad

[Download firmware](#)

<https://github.com/my3dltd/F1-MKS-V1.1-Firmware>

2

A / Copy the modified **lite\_cfg** file and **mkslite.bin** to the TF card,  
B / TF card plug in 3D printer Motherboard,  
C / on the power switch again.  
Will update automatically.

After the update, the files in the TF card are automatically invalidated (can be deleted) and can only be updated once. If you need to update again. Need to re-copy the file into the TF card.
